Professional Summary

Junior Full Stack Developer with commercial experience developing scalable web applications using Laravel, PHP, JavaScript, SQL, REST APIs, and modern frontend technologies. First Class Honours Computing Systems graduate with hands-on experience building full-stack platforms, authentication systems, database-driven applications, and responsive web interfaces.

Strong backend development focus with practical experience across full software development lifecycles including application architecture, API integration, database design, testing, debugging, and deployment-focused workflows. Additional experience with C#/.NET, Android development, Unity, and enterprise technical support environments.

Demonstrated ability to independently design, build, and deliver software projects across web, mobile, and desktop-focused environments using modern development practices and Agile methodologies.

Technical Skills

Languages

PHP, JavaScript, C#, Java, Python, SQL, Kotlin

Front-End Development

HTML5, CSS3, JavaScript, React, AngularJS, Tailwind CSS, Responsive Web Design

Back-End Development

Laravel, Flask, Node.js, RESTful APIs, JWT Authentication, MVC Architecture, Server-Side Development, WordPress

Databases

MySQL, SQLite, SQLAlchemy

Tools & Platforms

Git, Azure, Android Studio, Visual Studio Code, Jira, Unity, Microsoft 365 Admin Center

Additional Technologies

REST API Integration, Full Stack Development, Object-Oriented Programming, Agile Development, Technical Troubleshooting, Cross-Platform Optimisation

Professional Experience

IT Technician

GBS (Global Banking School), London

April 2025 – Present

- Provide enterprise-level technical support across multiple campus environments, troubleshooting hardware, software, networking, and Microsoft 365 infrastructure issues.
- Manage user accounts, permissions, and workstation deployments using Microsoft Admin Center and enterprise support workflows.
- Resolve technical incidents and service requests through Jira-based ticket management systems while maintaining operational continuity across teaching environments.
- Configure, maintain, and troubleshoot Windows systems, classroom technologies, peripherals, and networking equipment.
- Explored PowerShell-based automation solutions to optimise repetitive support workflows and improve operational efficiency.
- Strengthened analytical troubleshooting and systems knowledge through hands-on support within live production environments.

Web Application Developer (Placement Year)

Ulster University, London

September 2022 – May 2023

- Led development of a database-driven POS web application using Laravel, PHP, JavaScript, HTML, CSS, and SQL technologies.
 - Designed and implemented responsive frontend interfaces and backend application functionality across the full development lifecycle.
 - Developed scalable web application features including authentication flows, CRUD operations, and database integration.
 - Conducted requirements analysis, debugging, testing, and performance optimisation to improve reliability and user experience.
 - Collaborated on feature planning, application architecture, and technical implementation from conception to deployment-ready delivery.
-

Projects

TaskPilot – Full Stack SaaS Task Management Platform

Tech Stack: React, Flask, SQLAlchemy, JWT Authentication, Tailwind CSS, REST APIs

- Developed a full-stack SaaS task management platform featuring Kanban-style task organisation, analytics dashboards, file uploads, and AI-powered task generation.
- Built secure RESTful APIs supporting projects, tasks, comments, authentication, and persistent session management.
- Designed scalable backend architecture and relational database structures using SQLAlchemy.
- Integrated OpenAI API functionality to automate task suggestions and workflow insights.
- Implemented responsive frontend components and optimised application usability and performance.

Student Personal Finance & Budgeting Application

Tech Stack: Laravel, PHP, MySQL, JavaScript, HTML, CSS

- Designed and developed a full-stack financial management web application for students as part of university dissertation work.
- Implemented authentication systems, real-time data handling, financial tracking functionality, and database-driven architecture.
- Built responsive interfaces and backend logic using Laravel MVC architecture and SQL database integration.
- Conducted application testing and user-focused refinement to improve reliability and usability.

RepStack – Android Fitness Tracking Application

Tech Stack: Kotlin, Android Studio, SQLite

- Developed a mobile fitness tracking application featuring workout logging, scheduling systems, local data persistence, and gamification mechanics.
- Managed the Android development lifecycle including UI implementation, application testing, and production preparation for Google Play deployment.
- Engineered dynamic progression systems and user-focused mobile interfaces.

Google Play: <https://play.google.com/store/apps/details?id=com.richard.repstack>

First-Person Shooter Game – Unity & C#

Tech Stack: Unity, C#

- Independently designed and developed a fully functional FPS game implementing player movement systems, enemy AI, combat mechanics, and gameplay architecture.
- Applied object-oriented programming principles, performance optimisation techniques, and gameplay logic systems.
- Published the completed project publicly on Itch.io.

Itch.io: <https://rbadmintech.itch.io/overcharged-capture-command>

Education

Ulster University, London

BSc (Hons) Computing Systems

First Class Honours – May 2024

- Diploma in Professional Practice with Distinction
 - Dean's List Award for Outstanding Academic Achievement
-

Certifications

Windows 11 for IT Support: Intermediate Troubleshooting

Date: Feb 26, 2026
