## Professional Summary

Junior Software Developer with a strong backend focus and enterprise IT experience, combining hands-on web application development with real-world production environments. Experienced in designing, developing, and deploying web applications using Laravel, REST APIs, and SQL, alongside exposure to C#/.NET, Android, and Unity through shipped personal projects. Currently working as an IT Technician in a university environment, bringing strong problem-solving, systems knowledge, and Jira-based support workflows. Seeking a junior or associate software development role in a growth-focused team where backend and application development skills can be further developed.

**Other Skills:** SQL, Agile methodologies, REST APIs, HTML, CSS, Technical Troubleshooting & Analytical Problem-Solving

---

## Education

### Ulster University, London

BSc Hons Computing Systems

*Graduated: 2024 May:*

**First class honours and a Diploma in Professional Practice with distinction.**

Dean's List Award for Outstanding Academic Achievement (2021/2022).

---

## Professional Experience

### IT Technician

**GBS (Global Banking School), London**

*April 2025 – Present*

- ❖ Conduct daily classroom equipment checks, ensuring all lecturer PCs, projectors, and input devices function optimally; log results systematically using Excel for performance tracking.
- ❖ Provide on-site technical support to students and lecturers, troubleshooting hardware, software, and Microsoft 365 account issues efficiently throughout the day.
- ❖ **Utilize Microsoft Admin Center** to reset and manage user accounts, verify access eligibility through academic records, and maintain data security compliance.
- ❖ **Configure and deploy new and temporary workstations**, including setup of peripherals such as monitors, webcams, audio devices, and networking equipment.
- ❖ Assist with onboarding new staff, preparing hardware and ensuring seamless access to institutional systems and resources.
- ❖ Monitor and **resolve IT service tickets using Jira**, prioritizing issues for two active campus sites.
- ❖ Support university-wide enrolment sessions, guiding hundreds of students through Moodle account setup and troubleshooting login or system issues.
- ❖ Perform ongoing maintenance of classroom and lab computers, including software installation, updates, and secure data cleanup.
- ❖ Explored process automation with PowerShell and scripting-based solutions to optimize repetitive IT tasks (within system permissions).
- ❖ Demonstrated **strong analytical problem-solving** by independently diagnosing complex system issues and experimenting with solutions until resolved, deepening knowledge of Windows systems, Microsoft products, and update management.
- ❖ Displayed **self-driven learning and initiative** by using downtime to strengthen programming skills through AI-assisted study, and independently developed a fully functional FPS game using Unity and C#, published on *Itch.io*.

### Web Application Development ( University Placement )

**Ulster University, London**

*September 2022 – May 2023*

- ❖ **Led the development** of a full-featured POS web application, achieving a distinction score of 75/100.
  - ❖ **Conducted requirements analysis** to align the project with user needs and technical goals.
  - ❖ **Designed and implemented** core features using HTML, CSS, JavaScript, and Laravel, resulting in a scalable and user-friendly interface.
  - ❖ **Integrated** the application with a database for data persistence, improving data retrieval by 30%.
  - ❖ **Enhanced application performance** by conducting extensive testing and debugging, ensuring high reliability under various conditions.
-

## Projects

### Dissertation Project :

#### Personal Finance and Budgeting web application for students (Ulster University)

Developed a sophisticated web application as part of my dissertation project, focusing on advanced features and user experience. Utilised a modern technology framework Laravel with it's built in authentication methods and database integrations. Implemented complex functionalities such as real-time data updates, user authentication, and dynamic content rendering. Conducted user testing to refine the application and ensure a seamless user experience.

**GitHub:** [https://github.com/X1Alpha29/student\\_self\\_budgeting-Updated-V2.0](https://github.com/X1Alpha29/student_self_budgeting-Updated-V2.0)

### Personal Projects:

#### TaskPilot – Full-Stack SaaS Task Management App

Built a full-stack task management application using React, Flask, SQLAlchemy, JWT, and Tailwind, featuring a Kanban-style drag-and-drop interface. Developed RESTful APIs for projects, tasks, comments, and file uploads, with secure JWT authentication and persistent sessions. Integrated AI (OpenAI API) for task generation and insights and created an analytics dashboard to track progress. Implemented scalable architecture, UX enhancements, and background processing for improved performance.

**GitHub:** [GitHub - X1Alpha29/taskpilot: Full-stack SaaS task management app with AI features · GitHub](#)

#### Android Mobile Application: RepStack (Kotlin, Android Studio)

Designed and developed a comprehensive fitness calendar/tracking application, currently in **closed testing** with a scheduled release for **public production on Google Play**.

Implemented a local data management system for workout log persistence and engineered a dynamic “Power Level” gamification system that calculates user strength categorise based on lifting performance. Successfully navigated the full mobile development lifecycle, from initial UI/UX design in Android Studio to preparing the application for paid, published release

**Google Play:**

<https://play.google.com/store/apps/details?id=com.richard.repstack>

#### First-Person Shooter Game (Unity, C#)

Designed and developed a fully functional FPS game independently during downtime at work, showcasing initiative and self-learning. Built core systems such as player movement, weapon mechanics, enemy AI, and level design using Unity and C#. Focused on code structure, performance optimization, and user experience. Published the completed build on *Itch.io* for public access.

**Itch.io:**

<https://rbadmintech.itch.io/overcharged-capture-command>

I have Enrolled in a Udemy course on Android Development to strengthen my Java and mobile app development skills, gaining hands-on experience by building several types of Apps from simple unit converter to more complex ones.

In my free time I explored game development using well known game engines Unity and Unreal Engine 4.

---

## Certificates

### **Windows 11 for IT Support: Intermediate Troubleshooting**

**Date:** Feb 26, 2026

**Length:** 1 hour 46 mins

**Certificate url:**

<https://www.linkedin.com/learning/certificates/43dc763dec589becc0d0991de367f8bd628b58633b163bafd5f3a883cafd0f89>

### **Laravel: Make six projects with PHP and Laravel**

**Date:** June 2, 2024

**Length:** 37 hours

**Certificate url:** <https://www.udemy.com/certificate/UC-db7d830a-27fd-4c99-9ec5-956f752eb624>
